**RESEARCH INTERESTS**
Networked systems, Distributed systems, Data center networking, LLMs for networking and systems

**EDUCATION**

Ph.D. in Computer Science, **Korea University**, South Korea — Mar. 2012 - Feb. 2020
- Dissertation: Buffer Sharing Mechanisms for Data Center Networks
- Advisor: Prof. Wonjun Lee

B.S. in Computer Science, **Korea University**, South Korea — Mar. 2008 - Feb. 2012
- Interdisciplinary major: Brain and Cognitive Sciences

Exchange Student, **Lund University**, Sweden — Jan. 2011 - Jun. 2011
- Faculty of Engineering (Lund Tekniska Högskola, LTH)

**EMPLOYMENT HISTORY**

**REMARKS**

During my undergraduate, I developed KLUE (Korea University Lecture Evaluation, http://klue.kr), a lecture rating service for Korea University. In 2025, KLUE has 500K+ evaluation data and 60K+ members. Most students at Korea University use this service.
- Brief history: In Feb. 2010, upon the request of the 43rd Student Council, three KWEB student club members (including me) began a development project. Our team was in charge of the whole planning and development. The service was run by the student council as planned. However, in November 2010, the service was terminated provisionally due to an incident in which the student council violated the personal information handling policy. In January 2011, I revived the service and became the president. The 44-46th Student Councils supported server costs until we achieved financial self-sufficiency. I ran the service until February 2015. Since March 2015, KLUE has been run by KWEB members.(https://kwebofficial.com/). My experience developing and operating KLUE led me to explore networked systems during my Ph.D. journey.
